# OBSTRUCTION WARNING SYSTEM (OWS-V)

## PRODUCT DESCRIPTION

The Obstruction Warning System – monitors the opening protected by the fire curtain to ensure it is kept clear from obstruction. If the detection zone is obstructed, a warning device will be activated after 5 minutes. The time period can be adjusted, if required.

The OWS-V is compatible with both versions of Coopers Fire - Voice Warning Units (VWR and VWC). The Voice Warning unit will play the message “Warning, please remove obstruction” and the message will repeat until the obstruction has been removed.

**NOTE: An audio/visual warning device MUST be used with the OWS-V to alert the occupants.**

## INSTALLATION DETAILS

### Ceiling Mount Fix

The OWS-V can be installed flush with a false ceiling as illustrated below. Clamps on the side of the bracket will hold the sensor in position.

A rectangular cut out of 245mm x 40mm will need to be inserted into the ceiling for the bracket to be fitted for the OWS-3.

A rectangular cut out of 280mm x 50mm will need to be inserted into the ceiling for the bracket to be fitted for the OWS-5.

### Face Fix

The OWS-3 can be installed face fixed to the side of the FireMaster® Concertina head box using two 3.9 x 11 SDST screws as illustrated below.

## Installation locations

The OWS-3 should be installed at a maximum pitch of 2500mm around the FireMaster® Concertina™ head box and not closer than 1250mm to any angled sections of head boxing.

The OWS-5 should be installed at a maximum pitch of 4000mm around the FireMaster® Concertina™ head box and not closer than 2000mm to any angled sections of head boxing.
